

GUIDELINES FOR AUTHORS

Meteorites publishes only original works that have not been previously published in any journal, joint publication, conference materials, on the Internet, or in any other citable form, and that are not under consideration by other publications at the time of submission. Authors must own the copyright to the data, tables, figures and appendices. Manuscripts accepted for publication in Meteorites (and excerpts) must not be published in any periodical in any language without the permission of the editor-in-chief.

Authors are asked to communicate their contact details (including their e-mail addresses) to the editorial staff and two potential reviewers. Papers must be written in English. Authors are expected to have the papers reviewed linguistically prior to submitting. Papers should be prepared using Microsoft Word 97 or a later version. Figures must be provided in a jpg format with a printable version of at least 400 dpi. Only electronic submissions through e-mail will be accepted.

Italics should be used for equations and formulas only. Decimals should be separated with a point instead of a comma, and a space should be used as a thousands separator. Double or triple line spacing should be used and ample margins of at least 3 cm should be employed. The text should be justified and words should not be divided at the end of a line.

Tables and figures must be prepared on separate pages and not included as part of the main text. They must be numbered in Arabic numerals according to their sequence in the text. Captions to tables and figures must be placed at the end of the manuscript, after the references.

Appendices will be published by way of exception only and may include, but are not limited to, large tables with numerical or analytical results, or the sources of data used for the analysis. Equations and formulas must be centered and numbered consecutively and their numbers must be written on the right, justified in parentheses. Variables and constants should be de-

finied under equations and formulas. Refer to the example below.

$$v > \sqrt{\frac{2MG}{r}} \quad (1)$$

where:

v – escape velocity, $\text{m}\cdot\text{s}^{-1}$,

M – mass of body from which object is projected, kg,

G – universal gravitational constant, $\text{N}\cdot\text{m}^2\cdot\text{kg}^{-2}$,

r – radius of body from which object is projected, m.

The manuscript title should be bold and capitalized, e.g.: **ACHONDRITES AND THEIR PARENT BODIES**. Full name of the author(s) should be given below the title, followed by their affiliation(s), and exact postal address. In the case of a paper with more than one author, correspondence concerning the paper will be sent to the first author unless the editorial staff is advised otherwise by an underlining of the relevant name(s). First name should be given first and the initials of middle names and the surname, thereafter, e.g.: Tadeusz A. PRZYLIBSKI.

The abstract of up to 300 words and keywords of up to 9 words must be provided. Paper should be divided into sections, described by short headings. Section headings should be capitalized, e.g.: INTRODUCTION, EXPERIMENTAL / METHODS, DISCUSSION, CONCLUSIONS, etc. Acknowledgments may be included after the body of the text before the references.

Mineral and meteorite names used in the paper must conform to the current nomenclature guidelines of the International Mineralogical Association and the Meteoritical Society. If the name of a particular meteorite has not been officially recognized yet, an announcement will have to be published in Meteorites following its approval.

The “0.0” value must not be used for immeasurably small amounts of particles. The “n.d.” (not detected or no data) or “n.a.” (not available) abbreviations should instead be used.

CITING SOURCES

Cited sources should be enclosed within parentheses. The author's name and the year of publication should be separated by a comma. Papers with more than two authors should be cited by the first author's last name followed by „et al.”, and then the year of publication. If the particular author has two or more texts published in the same year, add a letter after the year to distinguish between them. The same letter should be

included in the list of works cited at the end of the paper. See the examples below which will be further used in the bibliography section.

(Rubin, 2003)
 (Hutchison, 2004)
 (Consolmagno & Britt, 2004)
 (Przylibski et al., 2005)

PREPARING REFERENCES

References should be arranged alphabetically. Multiple citations of the same author should be listed chronologically. Works by two authors should be cited by using their last names and should be arranged alphabetically by the names of the authors. Multiple papers by the same author having the same publication date should be distinguished by consecutive letters of the alphabet commencing with “a”. Multiple publications with the same co-author should be listed chronologically. See the examples below.

Rubin A.E., 2003 – Chromite-Plagioclase assemblages as a new shock indicator; implications for the shock and thermal histories of ordinary chondrites. *Geochimica et Cosmochimica Acta*, 67 (14), 2695–2709.
 Hutchison R., 2004 – Meteorites: A petrologic, chemical and isotopic synthesis. Cambridge University Press, New York.
 Consolmagno G.J., Britt D.T., 2004 – Meteoritical evidence and constraints on asteroid impacts and disruption. *Planetary and Space Science*, 52 (12), 1119–1128.

Przylibski T.A., Zagożdżon P.P., Kryza R., Pilski A.S., 2005 – The Zakłodzie enstatite meteorite: Mineralogy, petrology, origin, and classification. *Meteoritics & Planetary Science*, 40 (9), Supplement, A185–A200.

Please refer to the latest issue in case of any doubts regarding the preparation of the manuscript. Proofs will be sent as a PDF file to the e-mail address of the corresponding author. Only minor changes that do not alter the arrangement of the text and corrections of editorial errors will be allowed at this stage. Substantial changes to the text will not be accepted. Proofs should be returned to the editorial staff within seven calendar days. A PDF file of the article will be sent free of charge to the corresponding author immediately after publication.

COPYRIGHT INFORMATION

The author retains the larger portion of the copyright. The following applications of the article are not subject to the editorial staff's opinion or approval:

- making hard and electronic copies of the article for the personal use of the author, including the personal use connected with teaching,
- making copies of the article for the personal use of the author's colleagues from similar fields of research,
- presentation of the article to any forum (conference, symposium or other official meeting) and the document's distribution among its participants,

- obtaining patents based on information contained in the article,
- re-use of all or part of the published article in the author's doctoral thesis or other scientific papers,
- re-use of all or part of the published article in compilations of the author's publications,
- re-use of all or part of the published article in books on the condition that a reference is made to the first publication of the article.
